# SCIENCE

S Y N T H E S I S

# WIN CASH PRIZES

1st Place Award - \$2,000

2nd Place Award - \$1,250

3rd Place Award - \$500

## SCIENCE + THE Arts SYNTHESIS

The Science + the Arts Synthesis is an interdisciplinary annual themed research competition with a 1st, 2nd and 3rd place award. Students can work individually or team up to conduct scientific research and produce artistic representations based on the present theme.

The Arts are explored and integrated in this collaborative endeavor either by being the subject of research itself or by being the means of interpreting and/or communicating research.

“Sometimes when you’re in the tyranny of the moment, you can’t always see what the solution could possibly be, but scientists and artists are pretty trained at looking for the unexpected. And I think that’s a unique shared skill each brings to the problem-solving experience.” — *Lisa Hoffman*
